NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Purchase of STAR

The semimonthly issues and the cumulative index issues for the 1965 volume year are available postpaid on subscription and in single copy from the Superintendent of Documents, United States Government Printing Office, Washington, D.C., 20402, United States of America.

Semimonthly issues. Annual subscription rate: \$25.00, domestic; \$31.00, foreign. Price per single copy: \$1.50, domestic; 25¢ extra for foreign mailing.

Cumulative index issues. Annual subscription rate: \$30.00, domestic; \$34.00, foreign. Price per single copy varies according to the number of pages.

Domestic subscription rates apply to the United States, Canada, Mexico, and all Central and South American countries, except as noted below.

Foreign subscription rates apply to Argentina, Brazil, British and French Guiana, Surinam, British Honduras, and all other countries throughout the world.

Payment should be by check, money order, or document coupons, and must accompany order. Remittances from foreign countries should be made by international money order, or draft on an American bank, payable to the Superintendent of Documents, or by UNESCO book coupons.

Published by: United States Government National Aeronautics and Space Administration Scientific and Technical Information Division

Scientific and Technical Aerospace Reports. Volume 3, is prepared by the NASA Scientific and Technical Information Facility operated for the National Aeronautics and Space Administration by Documentation Incorporated.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, January 9, 1965

Aerospace Reports.

"Scientific and Technical

SPECIAL NOTICE

Previous cumulative indexes to STAR indicated the issue and subject category, e.g., 13-20, as an aid to locating individual abstracts. This reference system required the user to search through several pages of the category.

To assist the user in locating individual abstracts, the subject category has been replaced by the page number, e.g., 13-2117, in the STAR Annual Index for 1965. The first two digits identify the issue and the four digits following the hyphen refer to the page on which the abstract appears.

It is hoped that the new system will encourage STAR users to bind the semimonthly abstract sections. Title pages for binding STAR Volume 3 are included in Section 1 of the Annual Index.

Scientific and Technical Aerospace Reports

Introduction

This Annual Index is an edited consolidation of the indexes to the individual issues of Scientific and Technical Aerospace Reports (STAR) for the calendar year 1965 (Volume 3, Numbers 1 through 24). For the convenience of the user, it is divided into four sections, each bound separately. Sections I and II contain the Subject Index. Section III contains a Corporate Source Index, a Contract Number Index, a Report/Accession Number Index, and an Accession Number/Report Index. Section IV contains the Personal Author Index. The Annual Index supersedes the semimonthly and quarterly indexes previously issued during 1965.

Each entry in this index includes an accession number, e.g., N65-12345, a unique identification number assigned by NASA to each document that was acquired, indexed, and announced in STAR during the year. In addition to the accession number, each entry includes a second number consisting of two groups of digits, e.g., 13-2117, to assist the user in locating a particular abstract in STAR. The first two digits identify the issue in which the document was announced, and the last four digits refer to the page number in that issue on which the abstract appears.

Prior to announcement in STAR, each reference is indexed by a number of carefully selected subject terms. In the listings of references that appear in the Subject Index, the Corporate Source Index, and the Personal Author Index, the subject of each reference is summarized by a brief Notation of Content (NOC) rather than by its original title. This practice has been adopted because an author's title may not be sufficiently informative or because the title may not have been composed of terms selected from the same vocabulary that provided the indexing terms for the reference. The same general practice has been followed in the consolidation of the semimonthly indexes.

For information on availability of STAR and documents, see Section I or II, pages iii and iv.

Listing of Reports by Personal Author

As an example of a typical entry for Section IV of the Annual Index, the entry under the personal author AAMODT, R. E., has been selected. For the information of users, it is reproduced below with its components labeled:

Kinetic theory of monrelativistic charged particles in fully ionized plasmas GA-5318 N65-26320 15-2602

The Notation of Content (NOC), rather than the title of the document, is used to provide a more exact description of the subject matter. The issue number, page number, and accession number are included to assist the user in locating the abstract in STAR.
